SUMMARY

Detail-oriented Electrical and Electronic Engineering graduate with direct hands-on experience in NOC/SOC operations, network performance monitoring, and data analysis at Huawei Kenya supporting Safaricom's Tier-1 live enterprise infrastructure. AWS Certified Cloud Practitioner with strong technical grounding in optical communications, 5G systems, cloud architecture, and embedded systems.

Proficient in technical problem-solving, structured data analysis, and system administration with a proven track record in KPI reporting, incident escalation, and cross-functional technical communication. Seeking to leverage prior operational and engineering experience to deliver immediate value within dynamic multidisciplinary engineering teams.

EDUCATION

University of Nairobi Nairobi, Kenya

BSc Electrical and Electronic Engineering (Upper Second Class Honours) Sept 2021-Sept 2026

Relevant Coursework: Optical Communication Systems, Computer Communication Networks, Cloud Computing, Networking, Power Systems, Control Engineering, Signal Theory & Modulation.

Clubs & Activities: UON Coding Club, ESA, IEEE Robotics and Automation Society

EXPERIENCE

Huawei Kenya | Service Operations Centre (SOC) Intern Jul 2025-Oct 2025

- Delivered L1/L2 technical support for Safaricom, a major Tier-1 client, ensuring platform stability and high network availability; developed strong client-facing communication skills.
- Analysed data from SmartCare/SEQ monitoring platforms to identify service anomalies and performance trends, translating technical findings into actionable KPI and CEM reports for stakeholder review.
- Assisted in physical server installation and configuration within live enterprise environments; collaborated across technical teams to resolve incidents and support operational continuity.
- Used SQL queries to extract and analyse network performance data; interpreted monitoring dashboards to identify service concerns and escalated findings with clear documentation to management.

TECHNICAL SKILLS

- **Network & Telecom:** NOC/SOC operations, KPI monitoring, SmartCare/SEQ, Telecommunications, Network fundamentals
- **Cloud & Infrastructure:** AWS (certified), Linux system admin, shell scripting, server installation & configuration
- **Data & Analytics:** SQL, dashboard-based analysis, KPI & incident reporting,
- **Programming:** Python, C++, SQL, Git/GitHub**,** Bash
- **Embedded Systems:** Arduino, ESP32
- **Certifications:** AWS Certified Cloud Practitioner(2025), MATHWORKS: Machine Learning (2024), MATHWORKS: MATLAB (2024), IBM: Cybersecurity Fundamentals (2024)

PROJECTS

- **Final Year Project (2025 – 2026):** Engineered a LoRa-based smart irrigation system using ESP32 and SX1278 LoRa modules for remote sensor data transmission and IoT-based monitoring. Achieved reliable communication to 800m urban NLOS range in field testing.
- **Hackathon Participant (2022 – Present)**: Competed in Huawei ICT Academy (2022–2025) and Power Learn Project (2025).
- **GitHub Contributions**: 10+ repositories spanning IoT, cloud, and networking projects.

LEADERSHIP AND VOLUNTEERING

Aspire Leaders Program Fellow (2024) | Academic Mentor (STEM) | Global Mentorship Participant (2024-2025)

INTERESTS

Telecommunications Infrastructure | Network Operations & Monitoring | Cloud Computing | IoT & Embedded Systems | Data Analytics
